

nanoTechnology Systems Pty Ltd purchase 5,000 tones of carbon credits.

Melbourne, .. 9th July 2009

nanoTechnology Systems has entered into a contract with BR Redd Ltd for the purchase of 5,000 tonnes of carbon credits. The credits will be generated as a result of projects being conducted by Carbon Strategic Pte limited in the Independent State of Papua New Guinea, Indonesia and the Solomon Islands. These projects will result in the Company acquiring REDD credits which are carbon credits generated by projects that reduce carbon emissions by reducing deforestation and degradation of forests.

The Company considers it has fully discharged its obligation to conduct business in an ethical way through its commitment to the purchase of these credits
